

Serdar DURSUN

Professor of Psychiatry & Neuroscience

Neurochemical Research Unit,
Department of Psychiatry,
University of Alberta,
Edmonton, Alberta, Canada

Serdar Dursun is a clinician, educator and researcher who has made significant contributions to translational neuroscience and psychopharmacology which have resulted in improved patient care. He has over 150 peer-reviewed publications and has been involved extensively in the development of innovative programs in psychopharmacology education and clinical care. Research interests include investigations into the neurobiological mechanisms and psychopharmacology of refractory mental states in schizophrenia and mood disorders using neuroimaging techniques and exploratory therapeutic trials.
